1. Price,
2. Degree of availability/response time to request for replacement of a vehicle in a specified location (for the purpose of applying the award criterion the referenced area is Bucharest)

Points for the component PRICE with a value of 80 points from the total of 100 points and a weighting of 80% in the total of the award criteria are granted as follow:

- a) For the admissible Offer with the lowest price – 100 points
- b) The rest of the admissible Offers the points are calculated using the following formulae:

$P_{price(n)} = Price (min) / Price (n) \times 100$, where:

$P_{price(n)}$: the points received by the evaluated admissible Offer

Price (min) the lowest price of an admissible Offer

Price (n) the price of the evaluated admissible Offer

The total score for the component PRICE is calculated as follows:

$P_{price(n)} \times 80\%$, where:

$P_{price(n)}$: the points received by the evaluated admissible Offer

80%: the weighting of the evaluation factor PRICE in the total score

For “Degree of availability/response time to request for replacement of a vehicle in a specified location “

For the benefit of “Degree of availability/response time to request for replacement of a vehicle in a specified location “, with a value of 20 points out of the total of 100 points and with a weight of 20% of the total benefits, the points will be awarded as follows:

For offers with the documented lowest response time to request for replacement of a vehicle in a specified location, the maximum number of points is awarded.

For the rest of the offers the points are calculated as follow:

$P_{\text{technical}(n)} \times 20\%$, where:

$P_{\text{technical}(n)}$: the points received by the evaluated admissible Offer

20%: the weighting of the TECHNICAL component in the total score

The **Total Score** will be determined as follows:

Points granted for the component **PRICE** (maximum 80 points) + points granted for **TECHNICAL** component (maximum 20 points) = maximum 100 points.

The ranking of the Final Offers will be determined based on the Total Score.

Based on the calculation method above, the admissible Offer with the highest Total Score will be declared “winner”.
